

SERVICE INFORMATION LETTER

SIL TBX-01
Revision A
November 21, 2023

MODEL(S)	TB20, TB30, TB40, TB60
PART NUMBER(S)	6430020-(), 6430030-(), 6430040-(), 6431060-()
DESCRIPTION	Advanced Lithium-ion Battery
TOPIC	Updated part number for Installation Manual and Operating Instructions
PURPOSE	Consolidation of four separate Install Manuals into one

1. PLANNING INFORMATION

A. Effectivity

This service information is applicable to the TB20, TB30, TB40, and TB60 models of Advanced Lithium-ion Batteries designed and manufactured by True Blue Power, a division of Mid-Continent Instrument Co., Inc.

There is no physical effect to the design, manufacture, performance, or certification of the product. This is a change to the support documentation only.

B. Reason

Each of the aforementioned models currently has its own Installation Manual and Operating Instructions document. However, due to all four models being built upon the same hardware architecture, and sharing the same operating software, the installation and operation between them has a very high degree of commonality. Thus, in order to maintain consistency, accuracy, and simplicity for all models within the “TBX” family, the four separate documents will be combined into a single document.

C. Description

The manual numbers listed on the next page will be superseded by a single manual part number that contains all the information from each manual. Information unique to each model will be clearly identified as such. As of the effective date in the “Accomplishment Instructions”, no further changes will be made to the latest revision of the existing manuals and all future changes to the TBX Installation Manual and Operating Instructions will be made to the new document number.

Existing manual part numbers:

<u>Model</u>	<u>Manual Part Number</u>	<u>Current Revision</u>
TB20	9019286	F
TB30	9019287	F
TB40	9019288	F
TB60	9019485	C

New manual part number:

<u>Models</u>	<u>Manual Part Number</u>	<u>Current Revision</u>
TB20, TB30, TB40, TB60	9020005	A

2. ACCOMPLISHMENT INSTRUCTIONS:

- A. The change as described herein will take effect on January 2, 2024.
- B. True Blue Power does not require the user to perform any action as a result of this Service Information Letter. It is a notice of change only.
 - i. If you have documentation referencing the existing manual part numbers, you may choose to update the documentation or consider 2.C. below as an alternative.
- C. This Service Information Letter may be used to demonstrate that the new manual part number can be utilized in lieu of, and as the most recent version, of the previous manual part numbers.
- D. 9020005 will contain a notice that identifies it as superseding the previous manual numbers.
- E. Where applicable, all other True Blue Power documentation with references to the manual part numbers will be updated to identify the change to the new part number.
